**Product Description** Have some fun outdoors with this Air-Powered Rocket! Watch as it flies sky high and blasts up to 27.4m.

**Air-Powered Rocket - Smyths Toys UK**

**Launching your rocket:** Use the same plastic pipe to make the launcher and for rolling the rocket shape so that you have a good fit. Try to make everything airtight so that you get the maximum power from your rocket. Once you have slid the rocket over the pipe, place the launcher on the ground and point the rocket in the air or at a target.

**How to make an Air powered paper rocket & bottle launcher**

Using air pressure, large paper rockets can be launched to altitudes of between 50 and 100 meters. The launcher is a chamber in which air is pressurized with a bicycle pump or small electric compressor. Paper

If you have to leave the launcher, the handle should make it easy to unscrew the cap piece and now it is impossible to build pressure in the launcher or fire off a rocket. If already pressurized make the first turn slowly to bleed the pressure off. You may need to rubber gasket to improve the seal. A water house gasket might fit.

How to make a Paper Rocket Launcher with PVC - YouTube

There are several options to consider in the design of compressed air rocket launchers. You'll want to determine your size or volume approach, what connections you'll use, and then settle in on the right valve mechanism. For the most part we found that 1" PVC provides a good balance between volume of air, size of launcher and cost of parts.
