A narrative exploration of world history and cultures Civilizations Past and Present presents a survey of world history, treating the development and growth of civilization as a global phenomenon involving the interaction of all of the world's cultures. The text includes all the elements of history -- social, economic, political, military, religious, aesthetic, legal, and technological -- to illustrate this global interaction. The 13th Edition has been substantially revised and made more concise while emphasizing world trends and carefully avoiding placing these trends within a Western conceptual basis.

This lively text offers a brief, readable description of our common Western heritage after Europe expanded into the rest of the world during the Renaissance, then through revolutions that have created today's technological global society. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms "supremacies and diversities" develop major themes of conflict and creativity throughout history. "Supremacies" centers on the use of power to dominate societies, ranging from warfare to ideologies. Supremacy seeks stability, order, and incorporation. "Diversities" encompasses the creative impulse that produces new ideas, as well as the efforts of groups of people to define themselves as "different." Diversity creates change, opportunity, and individuality. These themes of historical tension and change--whether applied to political, economic, technological, social, or cultural trends--offer a bridging explanatory organization. The text is also informed by five topical themes: technological innovation, migration and conquest, political and economic decision making, church and state, and disputes about the meaning of life. Throughout, judicious "basic principles" present summaries of historical realities and primary source projects offer students the chance to evaluate differing points of view about the past. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for courses on Western Civilization.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* "A dazzling history of Western ideas." "The Economist" "Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase." "Wall Street Journal" "[W]ritten with vitality and verve . . . a tour de force." "Boston Globe" Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"--competition, science, the rule of law, modern medicine, consumerism, and the work ethic--that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times
