Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified can be conducted in the P4 facility using containment equipment requirements specified for the P3 level of physical containment. Alternative combinations of containment safeguards are shown in Table II. Table II

Title: Section 61-1.14 - Physical containment levels; P4 ...

These principles are containment and risk assessment. The fundamentals of containment include the microbiological practices, safety equipment, and facility safeguards that protect laboratory workers, the environment, and the public from exposure to infectious microorganisms that are handled and stored in the laboratory.

Biosafety in Microbiological and Biomedical Laboratories

U.S. – IAEA Safeguards Agreement. The United States (U.S.) – International Atomic Energy Agency (IAEA) Safeguards Agreement is a treaty between the U.S. Government and the IAEA for the application of international safeguards on nuclear material at facilities in the U.S. Although not required to do so under the Treaty on the Non-Proliferation of Nuclear Weapons (NPT), the U.S. voluntarily signed (in 1977) and brought into force a safeguards agreement that permits the IAEA "... to apply ...

U.S. – IAEA Safeguards Agreement | NRC.gov

Certified essential poliovirus laboratories and Sabin-IPV vaccine production facilities handling and storing OPV/Sabin materials (but no WPV) must implement final provisions for containment of all OPV/Sabin polioviruses, including primary and secondary safeguards . Once Phase IIIb begins, facilities that have not received national certification for final containment of all OPV/Sabin polioviruses will no longer be permitted to handle and store OPV/Sabin materials.

World Health Organization Guidelines for Containment of ...

Poliovirus-essential facility (PEF): see Facility, poliovirus-essential. Safeguards, primary: Containment precautions and stipulations designed to minimize the facility-associated poliovirus risk of exposing and/or infecting populations. Primary containment safeguards reduce the likelihood of accidental or
