When they discover a signal emitting from the interior of the Chicxulub crater, Michael Altman and his girlfriend, Ada, lead a team to a stone that unleashes visions, violence, and a warning that prompts the foundation of a radical new church.

The second tie-in novel to the hugely popular video game 'Dead Space'.

An investigator must solve a brutal murder on a claustrophobic space station in this tense science fiction thriller from the author of Salvation Day. Hester Marley used to have a plan for her life. But when a catastrophic attack left her injured, indebted, and stranded far from home, she was forced to take a dead-end security job with a powerful mining company in the asteroid belt. Now she spends her days investigating petty crimes to help her employer maximize its profits. She's surprised to hear from an old friend and fellow victim of the terrorist attack that ruined her life--and that surprise quickly turns to suspicion when he claims to have discovered something shocking about their shared history and the tragedy that neither of them can leave behind. Before Hester can learn more, her friend is violently murdered at a remote asteroid mine. Hester joins the investigation to find the truth, both about her friend's death and the information he believed he had uncovered. But catching a killer is only the beginning of Hester's worries, and she soon realizes that everything she learns about her friend, his fellow miners, and the outpost they call home brings her closer to revealing secrets that very powerful and very dangerous people would rather keep hidden in the depths of space.

Perfect for both practicing therapists and students in respiratory therapy and associated professions, this well-organized text offers the most clinically relevant and up-to-date information on respiratory applied anatomy and physiology. Content spans the areas of basic anatomy and physiology of the pulmonary, cardiovascular, and renal systems, and details the physiological principles underlying common therapeutic, diagnostic, and monitoring therapies and procedures. Using a clear and easy-to-understand format, this text helps you take a more clinical perspective and learn to think more critically about the subject matter. Open-ended concept questions require reasoned responses based on thorough comprehension of the text, fostering critical thinking and discussion. Clinical Focus boxes throughout the text place key subject matter in a clinical context to connect theory with practice. Chapter outlines, chapter objectives, key terms, and a bulleted chapter summary highlight important concepts and make content more accessible. Appendixes contain helpful tables and definitions of terms and symbols. NEW! Chapter on the physiological basis for treating sleep-disordered breathing clarifies the physiological mechanisms of sleep-disordered breathing and the various techniques required to treat this type of disorder. NEW! Reorganization of content places the section on the renal system before the section on integrated responses in exercise and aging to create a more logical flow of content. NEW! More Clinical Focus scenarios and concept questions provide additional opportunities to build upon content previously learned and to apply new information in the text.

This edition includes in-depth coverage of the physiology of the heart, lungs and kidneys, offering coverage of the kidneys because of the renal system's role in maintaining acid-base balance and fluid volume, and because renal failure affects the health of the cardiopulmonary system.

No writer has rendered our borderless, post-colonial world more acutely or prophetically than V. S. Naipaul, or given its upheavals such a hauntingly human face. A perfect case in point is this riveting novel, a masterful and stylishly rendered narrative of emigration, dislocation, and dread, accompanied by four supporting narratives. In the beginning it is just a car trip through Africa. Two English people--Bobby, a civil servant with a guilty appetite for African boys, and Linda, a supercilious "compound wife" [117]-- are driving back to their enclave after a stay in the capital [111]. But in between lies the landscape of an unnamed country whose squalor and ethnic bloodletting suggest Idi Amin's Uganda. [111-12, 120, 130-1, 150, 178, 220-40] And the farther Naipaul's protagonists travel into it, the more they find themselves crossing the line that separates privileged outsiders from horrified victims. Alongside this Conradian tour de force are four incisive portraits of men seeking liberation far from home. By turns funny and terrifying, sorrowful and unsparing,In A Free Stateis Naipaul at his best.
