Drying is one of the most energy-intensive unit operations in industrial processing. In case of evaporative drying, a large part of the required energy is used in the form of thermal heat (i.e., heat generated directly by combustion of fuel or indirectly from steam or using hot oil through a heat exchanger) in the drying process.

Handbook of Industrial Drying, Fourth Edition

Handbook of Industrial Drying, Fourth Edition. Author/Affiliation. Arun S. Mujumdar, National University of Singapore. Industrial drying continues to attract increasing attention from industry and academia in view of its inherently energy-intensive characteristics. This completely revised fourth edition includes 16 new chapters to ensure readers benefit from the latest developments in the field.

Handbook of Industrial Drying, Fourth Edition

Handbook of Industrial Drying, Fourth Edition Editor/Affiliation Arun S. Mujumdar, National University of Singapore This Fourth Edition book includes 12 new chapters covering computational fluid dynamic simulation; solar, impingement, and pulse combustion drying; drying of fruits, vegetables,

Handbook of Industrial Drying, Fourth Edition

The Handbook of Industrial Drying, Fourth Edition not only delivers a comprehensive treatment of the current state of the art, but also serves as a consultative reference for streamlining industrial drying operations. New to the Fourth Edition: Computational fluid dynamic simulation; Solar, impingement, and pulse combustion drying; Drying of fruits, vegetables, sugar, biomass, and coal; Physicochemical aspects of sludge drying; Life-cycle assessment of drying systems

Handbook of Industrial Drying, Fourth Edition | Arun S ...

The Fourth Edition book not only delivers a comprehensive treatment of the current state of the art, but also serves as a consultative reference for streamlining industrial drying operations. New to the Fourth Edition: Computational fluid dynamic simulation; Solar, impingement, and pulse combustion drying; Drying of fruits, vegetables, sugar, biomass, and coal; Physicochemical aspects of sludge drying; And life-cycle assessment of drying systems.
