If you've ever thought about starting your own farm or homestead but weren't sure how to get started, follow Shannon and Stewart Stonger, two self-made homesteaders, and their plan on how to start and succeed at homesteading. Shannon and Stewart left their home in the city and moved to an empty plot of land, with hopes of starting their own farm. Their research and experiences produced not only a successful and fruitful farm, but also a fully functional homestead, without modern conveniences. They'll show you how they did it, and how you can do it too, all on a budget. You'll learn how to plow your land, grow your own fruits and vegetables, create a viable water source for watering crops, harness energy from wind and the sun, preserve the harvest through canning and dehydration, raise livestock and much more. These attainable, game-changing tips and projects will allow you to live a simple, debt-free life and start your own agricultural homestead, all with your own two hands.

A look inside the subculture of off-grid living, taking readers across the ideological spectrum and across America Written by a leading authority on living off the grid, this is a fascinating and timely look at one of the fastest growing movements in America. In researching the stories that would become Off the Grid, Nick Rosen traveled from one end of the United States to the other, spending time with all kinds of individuals and families striving to live their lives the way they want to-free from dependence on municipal power and amenities, and free from the inherent dependence on the government and its far-reaching arms. While the people profiled may not have a lot in common in terms of their daily lives or their personal background, what they do share is an understanding of how unique their lives are, and how much effort and determination is required to maintain the lifestyle in the face of modern America's push toward connectivity and development.
