Abstract. Clinical judgment, one's ability to think like a nurse, is an essential skill for safe nursing practice. With the rise of simulation to replace clinical experiences, there is limited evidence regarding the effectiveness of simulation on the development of clinical judgment. This study explored differences in clinical judgment in maternal-newborn courses between undergraduate nursing students participating exclusively in simulation and those participating in hospital-based ...

including potential complications for each. Expert authors Dr. Shannon E. Perry, Kitty Cashion, Dr. Deitra Leonard Lowdermilk, and Kathryn R. Alden stress the importance of safe nursing practice as outlined in the Quality and Safety Education for Nurses (QSEN) initiative. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be used for quick reference in critical situations. Nursing Alerts highlight critical information that must be considered when providing care. Medication Guides in an appendix provide a key reference for common drugs and their interactions. Updated content provides the most current practice guidelines, including expanded information on obesity, the late preterm infant, and fetal heart rate pattern identification. Safety Alerts highlight developing competencies related to safe nursing practice in conjunction with the QSEN initiative on quality and safety in nursing care.

AJN Book-of-the-Year Award-Winner! A comprehensive women's health reference guide, this "pocket brain" delivers all the practical, evidence-based clinical information you need to care for normal and high-risk pregnant mothers, newborns, and their families in diverse hospital and community settings. This book delves into other women's health issues that may impact the care of the mother-baby dyad, such as culture, substance abuse, family planning, violence against women and sexually transmitted infections. Perfect for students, new-to-practice, or expert practitioners, this guide provides concise, comprehensive assessments, easy-to-understand tables of lab work-ups and values, common treatment guidelines and the steps to implement and evaluate nursing care. As a special feature to assist with learning how to check a cervix, you can practice using the dilation milestone cut outs inside the book!

A better way to learn maternal and newborn nursing! This unique presentation provides tightly focused maternal-newborn coverage in a highly structured text

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

"For courses in maternal and child nursing care in any nursing program" Help students think like nurses with maternal-newborn and pediatric clients As nursing courses are shortened and clinical experiences become more limited, time is increasingly precious to both students and faculty. Designed to support faster, more efficient learning in condensed courses, " Maternal & Child Nursing Care "presents key content about maternal-newborn nursing, women s health, and pediatric nursing topics in an accurate, readable way. Throughout this family-focused text, special attention is paid to health promotion, home/community care, patient and family education, clinical reasoning, evidence-based practice, and cultural competence. Engaging features help readers learn and retain essential concepts in a short period of time. The straightforward approach allows students to focus on what is most important developing the essential skills and abilities to practice nursing in fast-changing healthcare environments. Also available with MyNursingLab(r) MyNursingLab is an an online homework, tutorial, and assessment program designed to engage students in the Maternal/Newborn Nursing course and improve results. Its guided learning path is proven to help students think like a nurse as they move beyond memorization to true understanding through application. NOTE: You are purchasing a standalone product; MyNursingLab does not come packaged with this content.
