### Case Descriptions

Micro Case 1. Clinical history: Over the course of 1 week, a 6-year-old boy develops 0.5- to 1.0-cm pustules on his face. During the next 2 days, some of the pustules break, forming shallow erosions covered by a honey-colored crust. New lesions then form around the crust.

Problems This is the protocol that must be used for the cases: 1)

Open the case history from the class website, read it and study it. 2)

Type your answers directly after the case questions. 3) When your answers are completed, cut and paste the answers into an email to [drmuma@gmail.com](mailto:drmuma@gmail.com)
