With 48 used New Holland Medium Tractor available on Auto Trader, we have a fantastic range of farm equipment for sale across the UK.

Every year, thousands of people across the UK train to be a life, business or executive coach, yet many struggle to make a living. If they don't have the skills to run a successful business, they won't be able to create the business they need. In this book, you will discover 10 easy-to-follow steps to create your own successful business.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Ann Larkin Hansen offers expert advice on everything from scythes to disc mowers, and details the pros and cons of using horse power or tractors. You'll learn how to choose the right species for your soil, judge hay quality to buy or sell, and determine how many bales your animals need to stay happy, healthy, and energetic.

Scientists have long desired to create synthetic systems that function with the precision and efficiency of biological systems. Using new techniques, researchers are now uncovering principles that could allow the creation of synthetic materials that can perform tasks as precise as biological systems. To assess the current work and future promise of the biology-materials science intersection, the Department of Energy and the National Science Foundation asked the NRC to identify the most compelling questions and opportunities at this interface, suggest strategies to address them, and consider connections with national priorities such as healthcare and economic growth. This book presents a discussion of principles governing biomaterial design, a description of advanced materials for selected functions such as energy and national security, an assessment of biomolecular materials research tools, and an examination of infrastructure and resources for bridging biological and materials science.

A workbook on descriptive and subject cataloguing featuring practical examples and suggested solutions to reinforce theoretical concepts and practical application in descriptive cataloguing (using Anglo-American Cataloguing Rules, 2nd ed., 1998 rev.), bibliographic classification (using Dewey Decimal Classification, 21st ed.) and assigning subject headings (using Sears List of Subject Headings, 17th ed.). Includes examples for both manual and computerised creation of bibliographic records, thus preparing students for both automated and manual library and information service (LIS) environments While the workbook uses Anglo-American Cataloguing Rules, Dewey Decimal Classification and Sears List of Subject Headings as tools for information organisation, the major objective is to develop skills in information management and organisation While the workbook is likely to be predominately used in the instruction of first level library and/or information studies programmes offered by higher education institutions, it could very well be used in the LIS work environment

Elizabeth A. Sutton explores the fascinating but previously neglected history of corporate cartography during the Dutch Golden Age, from circa 1600 to 1650. She examines how maps were used as propaganda tools for the Dutch West India Company in order to encourage the commodification of land and an overall capitalist agenda.

The changing midwest as captured in new stories and select favorites by award-winning writer Will Weaver
