This note demonstrates the use of Multiple Responses Analysis in analyzing multiple responses data using SPSS software. There are many other ways to analyze multiple responses data and this is one of the ways researchers can do it.

### ~~(PDF) Multiple Responses Analysis using SPSS (Dichotomies ...~~

SPSS previously did not allow for inferential statistical testing on multiple response groups since such statistics violate certain assumptions. For example, one of the assumptions in doing a chi-square is that the responses of the row variables are independent from each other. A multiple response group violates that basic assumption.
