Do you know who - and what - you are? Do you know who you're meant to be? Do you know how to find the answers to questions like these? Knowledge of Self is the result of a process of self-discovery, but few of us know where to begin when we're ready to start looking deeper. Although self-actualization is the highest of all human needs, it is said that only 5% of people ever attain this goal. In the culture of the Nation of Gods and Earths, commonly known as the Five Percent, students are instructed that they must first learn themselves, then their worlds, and then what they must do in order to transform their world

for the better. This often intense process has produced thousands of revolutionary thinkers in otherwise desperate environments, where poverty and hopelessness dominate. Until now, few mainstream publications have captured the brilliant yet practical perspectives of these luminary men and women. Knowledge of Self: A Collection of Writings on the Science of Everything in Life presents the thoughts of Five Percenters, both young and old, male and female, from all over the globe, in their own words. Through essays, poems, and even how-to articles, this anthology presents readers with an accurate portrait of what the Five Percent study and teach, as well as sound direction on how to answer timeless questions like: Who am I, and why am I here? Why is there so much injustice in the world, and what can be done about it? Who is God and where on Earth is he? How do I improve myself without losing myself? Why are people of color in the situations they're in? What can we do about the global problems of racism and poverty?

Likened to a 48 Laws of Power for young Black men, this book presents Black biographies, history, and current events in a language that the Hip-Hop generation will understand and relate to. Each story or essay is framed within the context of a life lesson, each one being of vital importance to the survival, redemption, and ultimate success of our dying Black generation. Both the positive and negative sides of the Black experience are explored in detail, from the lives of infamous drug dealers and pimps to the exploits of Black revolutionaries and activists. In addition, several How To sections outline simple strategies for self-development. Packed with useful information, from the best way to handle confrontations with police, to the continuing relevance of the 1919 race riots, this book has been compared to an urban Encyclopedia Africana. Others have called it a Blueprint for Black Power for a generation struggling with materialism and short attention spans. This book is guaranteed to change the world by changing the way millions of people think and live. In How to Hustle and Win, author Supreme Understanding tells, in often graphic detail, stories like that of the infamous Philadelphia Black Mafia, Harlem's heroin kingpin Frank Lucas, and former gang leader Stanley "Tookie" Williams. In between and throughout these tales, he weaves life lessons and guidance, turning sordid stories of crime and urban despair into an educational experience. Whereas Robert Greene's bestselling 48 Laws of Power used iconic figures from classical history to illustrate the guidelines for personal success, How to Hustle and Win is filled with the exploits of rappers, gangsters, radicals, and revolutionaries. This is a new kind of Black history book, and its intent is the motivation and achievement of a new kind of reader. Although today's literary market has seen an influx of self-help books attending to a variety of issues, few books have attempted to address the concerns of young Black men, struggling to find direction. It is this group that author Supreme Understanding names as one of most troubled demographics in American society today. On the book's website, the author comments: "Unfortunately, few authors actively target this audience, and those who do are either not speaking their language, or not interested in

pushing for change. This is why *How to Hustle and Win* was written. This book will change the minds of millions of young men of color, and by doing this, it will ultimately change the world." Revolutionary aspirations aside, *How to Hustle and Win's* groundbreaking concept results in a truly appealing work. Its essays are delivered in short bursts, none of them over four pages long, making it ideal for struggling readers and those with shorter attention spans. At the same time, the book is filled with a wealth of information that would enlighten educated readers equally. In fact, the author juxtaposes his own personal tales of early delinquency and misdirection with his later years of professional success, including obtaining a doctorate in education at the age of 26.

This book is based on the true history of Allah "the Father" and His great Nation of Gods and Earths known as the Five Percenters. This is the greatest story that was never told by the Gods and the Earths during their younger years with Allah "the Father" from the early 1960s up until the time of his assassination on June 13, 1969. This was a time of struggle for the Black Man, Woman, and Child (the Universal Family). This was the time of "the Big Five", who were: Allah "the Father", who brought about the Nation of Gods and Earths known as the Five Percenters; the Honorable Elijah Muhammad, who was the last and greatest messenger of Allah, also the leader and teacher of the Black Muslims; Malcolm X of the new arrival; Dr. Martin Luther King, Jr., the civil rights leader; and the Black Panther Party on the East and West coasts. These five groups were called the Big Five, because they had the attention of every Black Man, Woman, and Child in the wilderness of North America and other parts of our planet. There was a host of other Black groups as well. This was a time when the Five Percenter's teachings were being taught/spoken so plain and simple that even a child could understand. Black people were on the rise, and it was a time for a change—for Black Man, Woman, and Child to take their place on earth. Peace!
