Knowledge of the metabolic fate of plant toxins in livestock is very important, both in terms of efficient animal production and the safety of animal products in the human diet. This is the first of four volumes intended to provide comprehensive, up-to-date information on the major plant toxins. The 12 chapters in this volume cover pyrrolizidine alkaloid (PA) toxicity and metabolism in ...

~~Toxicants of plant origin. Volume I. Alkaloids.~~

The first individual alkaloid, morphine, was isolated in 1804 from the opium poppy (*Papaver somniferum*). Alkaloids are a class of basic, naturally occurring organic compounds that contain at least one nitrogen atom. This group also includes some related compounds with neutral and even weakly acidic properties.
