### **With Shaking Hands: Aging with Parkinson's Disease in ...**

My hands don't usually shake, but when I'm eating and I raise my hand even a bit, it starts to shake. This is a problem when I'm for example eating at university with my friends. I usually lower my head a bit and steady my left hand (holding the fork) with my right hand by touching the fork with the knife. And when I'm drinking something, I have to steady the glass with my other hand.
